

We specialize in the design, fabrication and manufacturing of modular, turn-key command, communication & control systems, accessories and services. Our systems are primarily used in standalone, remote and harsh environments where mission critical reliability is required. We are subject matter experts in wireless video security and surveillance, IoT, portability, mobility data communications and sensing technologies. Federal, State & Local Law Enforcement agencies nationwide use our specialized surveillance systems for operations including security, monitoring, perimeter and national security protection programs. Our engineered solutions are based upon a robust modular ecosystem allowing rapid customization, adaptability and long term viability. We maintain in-house engineering, prototyping, fabrication, mechanical, electrical and environmental engineering capabilities.

Core Competencies

- Deep experience in: Covert Surveillance, Video Security, IP Video, Analytics, VMS & Physical Security.
- Specialists in: Mobility, Transit and Portability Wireless Data Systems and IoT system integration & design.
- Experts in Command, Communication and Control, Remote Monitoring and Sensor integration & design.
- Advanced & specialized mechanical, electrical, electronic, industrial and hardware integration services.
- WAN/LAN networking expertise including cellular, wireless, satellite, RF microwave, land line data systems SD-WAN, aggregation, bonding, VPN and related technologies.
- Extensive experience power systems design AC/DC power, transformation, protection and distribution. Alternative energy solutions; solar, energy harvesting, UPS, and integrated battery system design.
- Modular, adaptable and open hardware and control system infrastructure design specialization.
- Extensive fabrication capabilities: CNC, Industrial/3D Printing, Electrical, Machining, Sheet Metal.

Past Performance

Nearly 15 years of experience performance ranging from small project to large contracts

- Experienced prime & subcontracting performance on multiple IDIQ, GWAC & Multi-Year efforts.
- Leadership has experience and responsibility for aggregate sum of \$300MM+ contract awards.
- Award, design, production, delivery and support of thousands of systems on several programs.
- Experience with LES, FOUO & Secret Level Security Requirements.
